

Episode 1

Northumberland Zoo Part 1

Colourful Macaw's

In Episode 1 we met Millie the Macaw. This breed of Parrot can be very chatty at times, when they feel like it, but the other thing they are known for are the very bright and distinctive colourful feathers!

Their wingspan can be huge - up to around 160cm!

Imagine how that would look when they are flying around.

Your Challenge is to either draw your own, or use the templates below to design and colour in your own Macaw Parrot.

Be creative!

We would like you to share your creations with us by sending a picture of them to us on email to

info@leadinglink.co.uk

There will be prizes to be won and we will be sharing all of your hard work during future episodes!

You could have your work shown on the telly!

We look forward to hearing from you 😊
